

HEW JIA JING

Computer Science Fresh Graduate | Java & Backend Developer

+6018-273-9011 | jiajinghew@gmail.com | Selangor, Malaysia | <https://www.linkedin.com/in/jiajinghew/>

PROFESSIONAL SUMMARY

First-Class Bachelor of Advanced Computer Science graduate (CGPA 3.95/4.00) from Monash University with hands-on experience building production-grade backend services, REST APIs, and event-driven systems. Proven ability to significantly reduce production alerts, migrate legacy rules into maintainable Java services, and deliver end-to-end features using Spring Boot, SQL, and modern frontend tools. Collaborative team player with strong problem-solving skills and a track record of ownership in high-stakes financial systems.

EDUCATION

Bachelor of Advanced Computer Science | Monash University

Graduated: July 2026 | CGPA: 3.945 / 4.00 (First Class Honours)

PROFESSIONAL EXPERIENCE

Java Developer Intern (Fund Risk) | Ant International

Nov 2025 – Feb 2026 | Java, Spring Boot, SQL

- Significantly reduced production alert volume by optimizing financial risk-check rules across 1 regional tenant (Hong Kong), improving operational efficiency and reducing on-call noise.
- Migrated 50+ legacy MaxCompute SQL-based business rules into executable Java rule checks, validating business logic and database relationships prior to production deployment.
- Conducted production alert investigation and root-cause analysis across P0–P5 severity levels by tracing Java services and validating transaction data with SQL to identify bugs, data inconsistencies, and rule defects.
- Designed and implemented an AI-assisted rule migration workflow using MCP and ReAct agents, integrating a database MCP server and 3 custom tools to validate schemas and table relationships before code generation.

PROJECTS

Academic Dashboard Website (Final Year Project)

Mar 2026 – Jun 2026 | Java, Spring Boot, React.js, Firebase, REST APIs, Tailwind CSS

- Led frontend development of interactive dashboards for attendance, engagement, and at-risk student analytics using React.js and Tailwind CSS.
- Built Spring Boot REST APIs for classroom data processing, analytics pipelines, and seamless frontend–backend communication.
- Designed and integrated Firebase Firestore for persistent storage of classroom datasets, attendance records, and analytics results.
- Implemented data visualisation and reporting features enabling lecturers to identify attendance trends and students requiring intervention.

Ticket to Ride – Java Application

Mar 2026 – Jun 2026 | Java, OOP, Design Patterns, SOLID

- Led architecture and object-oriented design of a Java application developed by a 3-member team across 3 Agile sprints.
- Applied SOLID principles and design patterns (Command, Strategy, Visitor, State, Mediator) to create an extensible and maintainable codebase.
- Produced UML class and sequence diagrams to communicate system architecture, component relationships, and key interactions to the team.

Run Monash Database System

May 2025 – Jun 2025 | Oracle SQL, MongoDB, PL/SQL

- Designed and implemented a relational database system in Oracle SQL based on a real-world case study, including business rules and data integrity constraints via PL/SQL functions, triggers, and stored procedures.
- Populated and queried both Oracle and MongoDB databases to support complex user requirements across relational and non-relational models; applied relational algebra, transaction management, and JSON document transformation.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Spring Boot, React.js, Next.js

Databases: Oracle SQL, MongoDB, Firebase Firestore

Tools & Practices: Git, Jira, REST APIs, CI/CD, Agile, OOP, Design Patterns, Data Structures & Algorithms, Message Brokers

Languages (Spoken): English, Chinese, Malay

ACHIEVEMENTS & LEADERSHIP

Recipient of JPA Full Scholarship

- Awarded for outstanding academic performance and leadership potential; consistently maintained high academic results throughout the degree.

Student Mentor – School of Information Technology

- Mentored 15 new students, providing academic and personal guidance during university transition; organised engagement sessions and collaborated with faculty to monitor progress and support student success.
